Global overview of the Natural Style.....	7
Indicators.....	11
Adequacy and risk level factors .....	12
Charts.....	13
Comparison Job/Person.....	14
Positions on the Wheel.....	15

*This profile is designed to discover, analyse and understand the differences that may exist between the natural behavior of a person, which refers to what she is, and the behavior that is expected from her for a specific job in order for her skills to be used efficiently.*

Every single job requires some kind of adaptation to the work environment. It can express in :

- *a conscious strategy to succeed because the environment requires it,*
- *a survival strategy that a person is more subjected to and that is less conscious because the environment doesn't give the choice and which may reveal a more or less intense discomfort.*

This comparison helps you to become aware of the adequacy factors between natural style of the person and the concerned job, but also the stress level that may exist due to the disparities between the graphs. This comparison is presented in the following way :

- **A summary written report** of these 2 graphs and their possible differences.
- **A simplified schematic summary of the Job Graph with 16 indicators**, compared 2 by 2. Each one refers to the person's natural and adapted style and the job graph.
- **Two numbered indicators**, represented on measured scale from 0 to 100, help to analyze the risks related to the disparities between the natural style of the person and the job graph.
- **The three graphs** of the person's natural and adapted style and the job.
- **The positions of these three graphs represented on the Arc En Ciel DISC wheel.**

## ***Global overview of the Job***

This is a global overview of the concerned Job.

It describes its requirements as well as the behaviours required from the person who occupies it, for an optimal efficiency.

***These ones are expressed in terms of :***

- ***answer to the problems and the challenges, authority sense, decision taking***

- ☆ Logical approach to problems
- ☆ Realistic time management
- ☆ Cautious approach to new ideas

## ***Global overview of the Natural Style :***

This is an overview of the concerned person's Natural Style.

It describes its behaviours and needs favouring for the best her succes in terms of :

- ***answer to the problems and the challenges, authority sense, decision taking***
- ***relationship skills of communication and influence***
- ***management of the activity and change levels, persistency and listening***
- ***quality requirements and respect for rules and procedures***

- ☆ Trust based on facts
- ☆ Shows few emotions

*This page describes the two following indicators, evaluating the adequacy and risk level factors, which must be independently taken into account because each corresponds to a different way of analyzing the gaps between the graphs :*

**The first indicator ( 50 )** refers to the difference between the two graphs of the person's natural style and of the job for each of the four colours, independently analysed by percentage.

**The second indicator ( 55 )** refers to the difference between the two graphs of the person's natural style and of the job for each of the four colours, analysed side by side by percentage.

The lower the numbers and the closer they are to zero, the closer the graphs are to each other and the lower the risk level.  
The higher the numbers and the closer they are to 100, the further apart the graphs are to each other and the higher the risk level.

- From 0 to 5: low risk level
- From 5 to 10: risk level becoming significant
- From 10 to 15: significant risk level
- From 15 to 25: risk level becoming high
- From 25 to 100: high risk level

**INDICATOR 1 : 50**

INDICATOR 2 : 55

## Comparison Job/Person

This section is designed to discover, analyse and understand the differences that may exist between the natural behaviour of the person and the behaviour that is expected for a specific job in order for the skills to be used efficiently. It compares the shifts of the four colours according to these ones of the job increase or decrease in comparison with these ones of the natural style of the person.

***It helps to become aware of the risks of stress which may exist between these differences and to view the possibilities and conditions of and adaptation as well as the sensitive areas requiring a particular awareness.***

### **General meaning of the Colors that increase (unlike those that decrease)**

**Red** : more demanding with oneself and others, result oriented, aggressive and interventionist

**Yellow** : more expansive, friendly, relational and spontaneous

**Green** : more cooperative, orderly, focused, consistent, stable, coherent, nuanced and patient

**Blue** : more focused on the rules and procedures, perfectionist, precise, providing and thoughtful

### **General meaning of the Colors that decrease (unlike those that increase)**

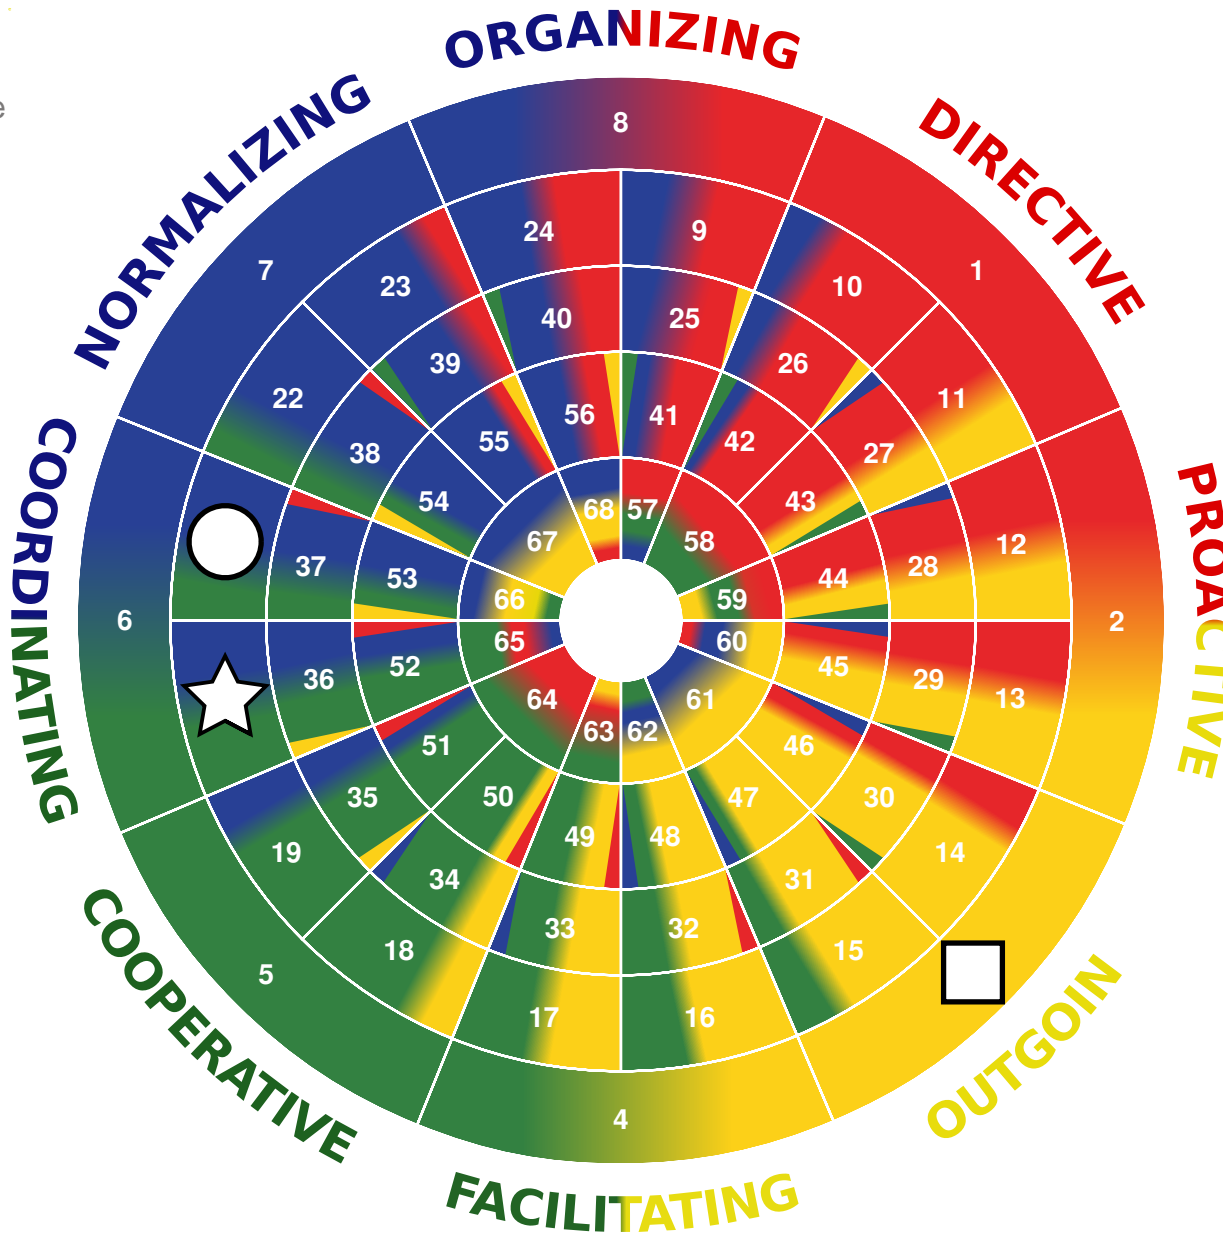

**Red** : more accommodating, attentive and peaceful

**Yellow** : more incisive, factual, logical, solitary, reserved and controlled

**Green** : more effervescent, fast and multi-tasking

**Blue** : more fearless, innovative and independent
